FBrF0075173

Dave:

Here are two mapped p-element lines which are homozygous lethal.

33-1 contains a insert of P82W (see map) at 94CD. This vector is based on Casper.

A1 contains an insert of a p-element containing the Drosophila pseudoobscura hsp82 gene in Carnegie 20. This insert is at 85E and was mobilized there from a stock originally created by Betsy Jaffe (Charles Laird's lab)
