10 March, 1997

Dear Dr Sur and Dr Mukherjee,

I am curating a paper of yours for FlyBase:
FBrf0091451 == Sur et al., 1996, D. I. S. 77: 144--146
in which you describe new P{lwB} insertion mutations.

The first gene, eclipse, you give the symbol ecl. Unfortunately this symbol has already been used for the gene 'echinus-like'. Do you have another symbol you would like to use that hasn't already been occupied? You can check your symbol against those already used by accessing FlyBase:
http://flybase.bio.indiana.edu:80/
from this first page you can go to 'Alternate Views' and onto 'FlyBase servers around the world' to chose a mirror site that may be more convenient to use than our main server.

Also you describe new mutations for the genes complete with phenotype data. Infortunately you did not give mutations of eclipse, air or fs(2)R an allele symbol. So I can trap the information you have provided for these mutations I have arbitrarily assigned allele 1 for each gene. If you have other allele symbol you would prefer to be used please let me know.

Do you have a fax number or email address? If so I could enter these in FlyBase for you to make correspondence with other researchers a lot easier.

I would be grateful if you could promptly reply to this query.

Many thanks,
Eleanor Whitfield
FlyBase

Dear Dr. Whitfield,

10th April, 1997.

Ref.: FBrf0091451 = Sur et al.,1996,
D.I.S. 77 : 144-146.

I have received your letter dated 10th March, 1997 only today. Thank you for pointing out my mistake. Kindly change the symbol for the first gene eclipse from ecl to ecp. For all the mutations eclipse, air and fs(2)R please keep the allele symbol as 1. I am providing details of my fax number and email address for further communication.

Thanking you,

Yours,
Ruplekha Sur
