38th Annual Drosophila Research Conference
Chicago, Illinois, April 16-20, 1997

79A

FlyBase Update Form

If you have new data for FlyBase, or know of errors in FlyBase, please note them below and return this form to FlyBase during this meeting.
Our demonstration is in the Colorado Room throughout the meeting.
Alternatively, you may return this form by mail to:

FlyBase
Harvard Biological Laboratories
16 Divinity Avenue
Cambridge, MA 02138 USA.

or send us update information by email to:

[redacted]

Thank you for your help.

Write your new data or corrections below. If the work is published, please give a traceable reference. These data will be referred to as 'Z. Bloggs, personal communication to FlyBase <date>. FlyBase will not correct data or add data unless they have a paper or email record. In particular FlyBase will not curate data from oral presentations or posters.

These names are temporary
A35 contains three SH3 domains - maps to 54D4-E7 by in situ hybridization

D59 contains leucine-rich repeats and is homologous to murine LAMP
maps to 54F3 - 54F6 by in situ hybridization

CH3 is a novel protein and causes a severe cell shape phenotype in S. pombe
maps to 77F3 - 77F5 by in situ hybridization.
