FAX number: _____
email [redacted]

Write your new data or corrections below. If the work is published, please give a traceable reference. These data will be referred to as 'Z. Bloggs, personal communication to FlyBase <date>. FlyBase will not correct data or add data unless they have a paper or email record. In particular FlyBase will not curate data from oral presentations or posters.

MCP (Mitotic Chromosomal Protein) is a gene encoding a mitotic chromosomal epitope (the gene in later 100C). This is a temporary name. The gene maps to 62C1-2 (55 in stu)
