FlyBase Update Form

If you have new data for FlyBase, or know of errors in FlyBase, please note them below and return this form to FlyBase during this meeting. Our demonstration is in the **Factoria** room throughout the meeting. Alternatively, you may return this form by mail to:

FlyBase
Department of Genetics
University of Cambridge
Downing Street
Cambridge, CB2 3EH
England

or send us update information by e-mail to:

[redacted]

Thank you for your help.

Date: 25.3.1999
Name: Nicole W. O'Brien
Address: 5500 Campanile Dr.
SD, CA 92182
Telephone number [redacted]
FAX number:
e-mail address: [redacted]

Write your new data or corrections below. If the work is published, please give a traceable reference. These data will be referred to as "Z. Bloggs, personal communication to FlyBase <date>". FlyBase will not correct data or add data unless they have a paper or e-mail record. In particular FlyBase will not curate data from oral presentations or posters.

The enhancer trap vector in AD170 is a P{lacW} insertion

The flightless mutants mentioned in abstract

398A corresponds to mutants in the gene

fldB = flight defective B - Maps to 89B

the alleles are

fldB[J10] recessive flightless insertion
[J38] recessive flight-impaired deletion
[CA7A] " deletion

all derived from AD170 J67 recessive lethal - [illegible] - probably a deletion - mutation in two complementation groups.
