FlyBase Update Form

If you have new data for FlyBase, or know of errors in FlyBase, please note them below and return this form to FlyBase during this meeting. Our demonstration is in the **Factoria** room throughout the meeting. Alternatively, you may return this form by mail to:

FlyBase
Department of Genetics
University of Cambridge
Downing Street
Cambridge, CB2 3EH
England

or send us update information by e-mail to:

[redacted]

Thank you for your help.

e-mail address: [redacted]

All four of our embryonic lethal alleles fail to complement (lethal)

Write your new data or corrections below. If the work is published, please give a traceable reference. These data will be referred to as "Z. Bloggs, personal communication to FlyBase <date>". FlyBase will not correct data or add data unless they have a paper or e-mail record. In particular FlyBase will not curate data from oral presentations or posters.

19K has been renamed double parked. ~~The~~

The four embryonic lethal alleles we have isolated are being referred to as alleles a1 - a4. double parked fails to complement both l(2)s1 Ec^{15} (the 15 allele) and also fs(2)PA77. We have determined that there is a single base pair change in fs(2)PA77 resulting in an arginine to cysteine change in the double parked ORF.
